\$5094.75 is as exact as we can get for now. Includes the following:

Remove existing Hi-Bay 250Watt Metal Halide fixtures and replace with 6 lamp Linear Fluorescent T-8 high output fixtures (see attached footcandle comparison charts).

\$4,870 + est of 224.75 = \$5,094.75

Can I just direct Fast Fab to get started and provide an exact amount for payment when they are done?

Lets proceed with the lighting project for now. We will need an exact amount so we can get you a check for the project.

Quote for hangar lighting and floor paint attached. Total for both is \$32,992.43. Biggest chunk of money is for the paint, but that will give the most benefit. We will work on a plan to clear out the hangar and store the aircraft for the ten days needed to do the job. Let me know what else you need from me to make this work.

I have attached the quote for the Hangar floor paint and for lighting change for the hangar. This project will greatly improve the lighting in our hangar which currently is an issue for our mechanics. This company is the contractor for Larson Baker, our property managers.
