Subject: Question on State Funding for children that are homeschooled

Does the State provide any funding for parents who are home schooling their children?

If so, are there records on who is receiving that funding in the Colorado City area?

Last, are there any provisions to check the academic progress of children who are home schooled?

Thanks.

Subject: FW: Uranium resources in N. AZ - technical documentation
Attachments: Breccia Pipe NEWS RELEASE - MLA.doc

See below.

Looks like we have new evidence showing uranium deposits might be 10-100 times greater than originally estimated.

Subject: FW: Uranium resources in N. AZ - technical documentation

As you can see from below, NRS's client, State Geologist Lee Allison, asked me to offer his agency's technical assistance on National Mining Ass'n v. Jewell, the challenge to the federal withdrawal order preventing new uranium mining claims. I believe Arizona has signed on to Utah's amicus brief in the 9th Circuit. AZGS has supported the profitability and safety of uranium mining in Northern Arizona.

Please let me know if you'd like me to get any further information or arrange anything.

Subject: Uranium resources in N. AZ - technical documentation

David, I saw that the AG weighed in on the lawsuit to overturn the withdrawal of ~1 million acres of federal land in N. AZ from mining exploration and development. We've been working in that region for some time and recently issued a report indicating the potential uranium resources could be ten to one hundred times greater than currently estimated. We were a cooperating agency with BLM on the studies before the withdrawal and have relevant info on that process and results.

We're happy to provide technical info or briefings on our geologic assessments.
