Senator

This email is in reference to the upcoming audit of the 2.1 million 2020 ballots. Please ensure that the 235,000 adjudicated ballots and 28,000 duplicate ballots are part of the 2.1 million audit to make it a completely transparent and authentic audit. I have been made aware that these ballots might be destroyed as soon as May 3. This must not happen. I do not want those irregular ballots destroyed because they need to be part of this audit. Please allow Jovan Pulitzer to scan all of the ballots using the Kinematic Artifacts Analysis.

Thank you for doing your part to make sure that this is as thorough an audit as possible so that the citizens of this State of Arizona can have full confidence in our elections going forward.

Respectfully,

Jennifer Baughman
