Subject: Use Jovan Hutton Pulitzer because he is the only one with the kinematic technology

Please use Jovan Hutton Pulitzer and his kinematic technology on the audit of the 2020 election. We want the very best and he can determine if there are fraudulent ballots. This does not mean he is going to manufacture them but rather that he can confirm if the ballots are legal or valid. We need his technology and experience to find out if they are legal. For those that do not want the best in technology to show the validity of the election, what are you trying to hide?
