Subject: Subpoena all 15 counties ballots & machines: Use Modern Technology in Fraud Detection to Audit Maricopa County Ballots

Please subpoena all machines & ballots and conduct a full forensic kinematic artifact audit. The Constitution is being attacked. My vote. My freedom to speak. My freedom to seek redress from my government. My freedom to bear arms. Let everyone know Arizona stands firm with the Constitution, both national & state. PROTECT US.

PLEASE DO THE RIGHT THING FOR ARIZONA.

It is past outrageous how much coordination we are seeing to obstruct justice by elected officials. If there is nothing to hide - let our ballots and our machines be forensically audited PROPERLY as requested!

I am grateful that you chose to embrace the Constitutional authority that our Forefathers bestowed upon you in subpoenaing and securing a forensic audit of the Dominion Voting Systems machines and our physical ballots. The decisions you are making regarding this forensic audit will not only impact the future of Arizona, but the future of our Nation and beyond. The entire world is watching.

I am asking you to ensure that our officials employ expert processes such as Jovan Pulitzer identified necessary using Tesla Laboratories (audit of 2.1M physical ballots) and Allied Security Operation Group (full forensic audit of every aspect of the machines) for a full forensic audit. Using companies with limited or antiquated capabilities based on past known fraud methods will not unearth the elements at play. We must avail our state of techniques which can detect all aspects potentially involved in the election fraud. The technology exists and must be employed.

The scope of ballot fraud has extended far beyond simply counting the number of ballots. Ballots were designed with specific parameters and ink features and are printed according to strict specifications on paper that conforms to the Safe Act. In 2000 physical ballots with "hanging chads" were visually inspected by humans for kinematic artifacts. Kinematic artifact technology is currently used to identify counterfeit currency, bank notes, bonds, stocks and passports. We ask that the same technology be employed to examine the physical ballot.

This technology has been made available to you for this forensic audit.

If an automotive manufacturer had customers experiencing massive catastrophic issues from something previously untested for when certifying their vehicles, nobody would expect them to pass the returned defects through the same, clearly limited process which certified them initially for release. If they did, the results would again say "nothing to see here."

Conscience, ethics, the severity of the issue at hand, not to mention legal necessity demands that their scientists use more specific methods which identify the issue at its root-cause. Obviously past methods of screening were inadequate.

Politicians across our nation insult their constituents with incomplete, incompetently handled audits. Independent, highly experienced professional auditors such as Allied Security Operations group and Tesla Laboratories can audit the Dominion Voting System machines and the paper ballots. Senate President Karen Fann and the Legislature in good conscience MUST thoroughly investigate and educate themselves on every

aspect of fraud that occurred. This is not possible if "old school" companies are engaged.

Let Arizona lead the way in using the best technology to examine election results. If there is nothing to hide, and given this has been made available to us, let's use the best methods possible. AZ Senate President Karen Fann and our Legislative members can lead the way as frontrunners "following the science."

Subject: Use Technology Used in Fraud Detection to Audit Maricopa County Ballots

To: Karen Fann -- President <kfann@azleg.gov<mailto:kfann@azleg.gov>>, <wpetersen@azleg.gov<mailto:wpetersen@azleg.gov>>, Michelle Ugenti-Rita <mugenti-rita@azleg.gov<mailto:mugenti-rita@azleg.gov>>

January 26, 2021

Senate President Karen Fann

Members of the Arizona Legislature: As you are aware, we are in politically troubling times. There was an unprecedented number of ballots mailed out and many conditions in the tabulation and scanning process which created ethical and legal impropriety issues and point to interference both in the process, in the ballots themselves, and in the electronic system. This election uncovered multi-pronged, unprecedented fraud that occurred in ways most never knew existed. The expression "death by a thousand cuts" is applicable here, when we voters were deciding the most important offices in our land: President, Vice President, and Senators. We cannot un-see what we have witnessed over the nearly 3 months since the election. People on both sides of the aisle in Arizona have lost their faith in the election process subsequent to hearings presenting what occurred.

The obstruction of our Governor and Secretary of State first in certifying without allowing due process to voters and legislature to hear what Rudy Giuliani and witnesses came to inform us of was absolutely stunning in disrespect and in actions against the public good. Their secondary behavior in holding our representatives hostage by refusing to call a special session so those who DID grant hearing could act on conscience and correct the votes submitted as allowed by the Constitution was their second massive attack on voters and legal process. Finally, the obstruction by the Board of Supervisors to surrender the voting machines and materials as ordered was insane, outside of the judicial process (subpoena's ignored). The final fissure was their surrender of these things one hour after the Senate results were issued. History will see clearly exactly what happened. There wasn't any pretense of representation and non-partisanship.

I am not alone in my horror at witnessing how our state officials acted. Many in Arizona irreparably lost trust in representation by Democrats and globalist leaning Republicans. Our right to due process, our right for redress with a very serious issue of great consequence to our nation both in the aforementioned, and in having barriers placed to keep us away while wild accusations of "insurrection", "sedition", "extremists" are flung at us are over the top. Many of us are parents, grandparents, and children of all races and walks of life. We have had peaceful protests since the election which NEVER resulted in violence or harm. The over-the-top Marxist activism behind the demonization of our right to gather and disagree with process is a very dangerous sign of the times.

The actions of tens of people under very shady circumstances (was this preplanned precisely to deny us our freedoms?) at the Capitol on 1/6/2021 do NOT have the right to remove our First Amendment right to seek redress from the government: our votes have not been protected, serious fraud occurred, and we expect our concerns to be addressed. That the radical Democrats in power now shame us as if we have no right to question the process we believe was corrupt is insane. Cancel culture is now saying we should be denied our Senators, our Representatives, our businesses, flights, equal participation in commerce, jobs, social media, and so on. Is this the America YOU believe we should be? Our confidence in the process supposed to ensure a free Republic has been shattered.

I am grateful that you chose to embrace the Constitutional authority that our Forefathers bestowed upon you in subpoenaing and securing a forensic audit of the Dominion Voting Systems machines and our physical ballots. The decisions you are making regarding this forensic audit will not only impact the future of Arizona, but the future of our Nation and beyond. The entire world is watching.
