Subject: Ballot analysis

When the Arizona Senate chooses an auditor, we need them to choose Jovan Hutton Pulitzer, one of the leading experts in this field. Mr. Jovan Pulitzer and Kinematic Artifacts Analysis need to audit all 2.1 million paper ballots and envelopes to see if they are legitimately printed ballots filled out by legitimate voters. This compete analysis can take less than a week to complete and can detect ballots flown in that were pre-filled, ballots filled out by same person and mail in ballots that were never mailed.

Since more and more election fraud is being identified, we need to have confidence that Arizona's elections and elected officials overseeing the elections can be trusted and are legally doing what they were elected to do.

Thank you,

Sharron LaLonde
