Subject: thank you Mr. Peterson for reading and for taking action

I ask the Senate to exercise their full authority as confirmed by the court to do the following four things to ensure a thorough and valid forensic audit:

1. Issue a new subpoena explicitly demanding that Maricopa County Tabulation and Election Center (MCTEC) gives full access of all election data and its facilities to the AZ Senate and the auditors to do a top down forensic audit.
2. Issue a new subpoena requiring in-place auditing, preventing the transportation of election data to any location other than MCTEC.

Suggested subpoena language for a Senate subpoena:

Recorder Stephen Richer is to turn the entire MCTEC operation over to the Senate, including its physical and electronic access, until auditors have finished a full forensic audit of the entire center. Normal operations not interfering with the audit may continue but under direction of the Senate.

3. Obtain a court order to protect all of Arizona's irregular ballots as required by statute. All irregular ballots. All 15 Counties. It is currently not protected by a court order, which is the only way to protect irregular ballots under ARS 16-624 (B).

Irregular ballots: Senators, please petition the AZ courts for an injunction against destruction of the irregular ballots, which may take place as early as May 2nd, 2021. All counties of Arizona are to be included in the injunction. Only the courts have the authority to preserve the irregular ballots, under statute ARS 16.624 (B).

4. Clarify the Statement of Work (SOW) to ensure 100% high resolution paper scanning of all ballots, envelopes, faxes for an exhaustive forensic computerized analysis with Kinematic Analysis.

Sincerely,

Dianna Anderson
