Comments:

Dear Senator Petersen: I am greatly appalled and embarrassed at the actions of the Arizona State Senate concerning election integrity! It is ridiculous and ironic to hire a third party organization named Cyber Ninja to handle and count ballots for a public election. Please note the definition (Webster) of ninja: a person trained in ancient Japanese martial arts and employed especially for espionage and assassinations There was no election fraud perpetrated by Democrats or some imagined dark forces in Arizona. The only fraud is the lie perpetrated by the former president, the ONLY president ever in the history of this country to attempt to prevent the peaceful transfer of power. He and his army of liars target gullible citizens, including Sidney Powell whose current legal defense against the Dominion lawsuit is that no reasonable person would believe her election fraud claims. I guess you think you're saving the country, but you're doing just the opposite. You continue to pour gasoline on our democracy and then take no responsibility when insurrectionists - a large number of them who are white nationalists - destroy our capitol and come close to assassinating elected officials. The vast majority of Arizona citizens, who went to the polls and exercised our right to vote in the election in November are watching you. You bring worldwide shame to our Great State. Cathy Davis
