In regard to your email, I apologize, I meant that we had that many “assisted” in our election and the first couple were not logged as poll workers did not realize where the signature was to be captured. When it was remedied, the 16 on the list were logged. Of those assisted at Cesar Chavez, these four voters were assisted by Guillermina (Guillermina Fuentes’ signature was matched to those 4):

Jesus Garcia
Armando Robles
Maria Laguna
Beatriz Ulloa

Their screenshots are attached with information and the phone numbers below from my clerk. Mr. Robles now shows a deceased record and his information indicates he passed away [REDACTED] I spoke to Mr. Knuth in regard to this practice as it is a common practice and usually many more assisted than this number – it seemed requiring them to sign detoured the volume we have seen in past elections of “assistants”.
